When Legitimacy Becomes a Liability: How Economic Securitization Shapes Global Firms' Socio-Political Strategy

- *Prepared for submission to Academy of Management Journal*
- *Interviews: China (2023, 2025), Japan (2024), United States (2024, 2025)*
- Abstract: Why do governments increasingly invoke national security to criticize foreign multinational enterprises (MNEs), and how do affected firms respond? I argue that economic securitization (ES)—the framing of foreign investment as a national security threat—is an extreme political risk, activated when host country legislators face competitive elections in constituencies exposed to foreign economic competition. Under emergent ES risk exposure, firms substitute away from elite-targeted lobbying toward social investment to establish broader legitimacy. Once ES risk consolidates, however, high-profile social engagement becomes a liability, as local embeddedness now reads as suspicious foreign influence, so MNEs scale back both political and social channels. Using a staggered difference-in-differences design with an original dataset of 5,484 U.S. legislator-session observations (2005–2024) and 634 foreign MNEs operating in the United States (2013–2024), I find empirical support for these propositions. Twenty-one interviews with senior corporate and policy professionals further reveal how MNEs choose among different strategies in response to different risk levels. Overall, this paper theorizes economic securitization as a novel political risk, showing that the trade-off between corporate political and social strategy is risk-stage contingent. It offers managerial guidance for global firms operating in increasingly politicized contexts.

[3] Sink or Swim Together? How the Rule of Law Affects Cross-Border Investment

- *Finalist for 2026 UNCTAD-AIB Award for Research on Investment and Development*
- Abstract: International investment has facilitated economic cooperation among states and multinational enterprises (MNEs), yet it constantly suffers from regulatory uncertainties and institutional hazards. How does the rule of law (RoL) in targeted markets affect MNEs' cross-border investment? I argue that the RoL has differential effects on different types of cross-border investment. In particular, strategic mergers and acquisitions (M&As) establish new global value chains (GVCs) or strengthen existing ones to foster economic collaboration, which are less observed in the financial M&As that are purely profit seeking. Moreover, weak RoL may deter more strategic M&As due to GVC linkages that can transfer spillover effects to home countries. Based on data from the International Country Risk Guide and Capital IQ for 140 countries (2010–2021), I find that law de jure significantly promotes M&A values only when law de facto is at a middle or high level. Overall, this paper explores the differential impacts of law on cross-border investment, calling for emerging markets and new democracies to improve institutional quality and law enforcement capacity for sustained global economic cooperation. The paper also offers practical managerial implications for corporate leaders to enhance legal astuteness.

[2] Geopoliticized Industrial Policy: Power Rivalries and the Allocation of Government Subsidies (with [Boliang Zhu](#))

- *Prepared for submission to Journal of International Business Studies*
- Abstract: We examine the revival of industrial policy in the United States amid an evolving global geopolitical environment. We argue that federal industrial policy reflects a dual logic: it functions as an instrument of statecraft to enhance strategic and technological advantages vis-à-vis global rivals, while simultaneously serving as a vehicle for domestic political distribution. Using a novel firm-level dataset that combines information from Good Jobs First's Subsidy Tracker and Bureau van Dijk's Orbis Historical database, we analyze the allocation of federal subsidies across more than 2 million firm-year observations from 2010 to 2021. Our results show that firms more exposed to Chinese import competition and those operating in industries targeted by the "Made in China 2025" initiative are significantly more likely to receive federal support, while political connections also play a critical role. We develop a comprehensive framework for understanding the new wave of industrial policy and demonstrate that contemporary U.S. industrial policy is shaped by both global strategic rivalry and domestic political considerations.

[1] Probabilistic Record Linkage at Scale: A Human–AI Interactive Pipeline for Firm-

Level Research (with [Lingyu Jack Fuca](#) and [Boliang Zhu](#))

- *Prepared for submission to Management Science*
- Abstract: Research on private organizations increasingly depends on integrating heterogeneous data sources that rarely share common identifiers, such as financial statements, patent filings, lobbying records, and ownership registries. Resolving which records refer to the same firm is therefore a foundational empirical step, yet existing approaches force a trade-off between scalability and accuracy. Purely deterministic methods miss true matches in messy data, while fully automated probabilistic methods generate false positives that propagate silently through downstream analyses. In this paper, we propose a human-in-the-loop pipeline for large-scale firm record linkage built upon the Splink package, with diagnostic transparency as the organizing principle. Specifically, we combine a three-tier tokenization scheme for company names with recall-prioritizing blocking rules, and embed researcher review with auditable diagnostics throughout model training, feature selection, and threshold tuning. We further illustrate the pipeline by linking Good Jobs First's Subsidy Tracker to Bureau van Dijk's Orbis firm universe, showing that the workflow generalizes to a broad range of record linkage tasks. The result is a computationally efficient, transparent, and replicable workflow that lowers the barrier to large-scale data integration across disciplines.

TEACHING & MENTORSHIP

Mentor, Undergraduate Research Apprentice Program	2025-26
Mentor, Institute for Research on Labor and Employment	2024-25
Graduate Student Instructor, International Political Economy	2024
Head Graduate Student Instructor and Lab Instructor, Introduction to Empirical Analysis and Quantitative Methods	2023-24
Graduate Student Instructor, Introduction to International Relations	2022
Teaching Assistant, Statistical Methods for Business and Economics (master-level)	2021

SELECTED AWARDS

Doctoral Fellowship, Chiang Ching-kuo Foundation, \$25,000	2026-27
Hans J. Morgenthau Fellow, O'Brien Notre Dame International Security Center	2026-27
Research Collaboration Grants, Institute for Humane Studies, \$16,000	2024-27
John L. Simpson ABD Fellowship in International & Area Studies, Berkeley, \$5,500	2026
Best Reviewer, International Management Division, Academy of Management	2026
Emerging Scholar Award (nominated), Women in the Academy of International Business	2026
AI Academic Upskilling Fellowship, Oxford Martin AI Governance Initiative	2026
AI-Accelerated Scholarship, Institute for Humane Studies, \$1,800	2026
Junior Fellow, Institute for Humane Studies, \$7,000	2026
Travel Grant, International Management Division, Academy of Management	2026

Travel Grant, Social Issues in Management, Academy of Management	2026
Travel Grant, Federalism & Intergovernmental Relations, APSA	2026
Dissertation Completion Fellowship, Berkeley	2025-26
Humane Studies Fellowship, Institute for Humane Studies, \$10,300	2025-26
Doctoral Travel Award, Academy of International Business	2025-26
Travel Grants, Political Communication, American Political Science Association	2025-26
Berkeley Economy and Society Initiative Grants, Hewlett Foundation, \$18,000	2023-26
Graduate Student Research Award, Citrin Center for Public Opinion Research, \$2,000	2025
Residency Funding, Institute for Humane Studies, \$8,000	2025
Travel Grant, Comparative Politics, American Political Science Association	2025
Helping Hands Scholarship, Women in the Academy of International Business (declined)	2025
Conference Travel Grants & Professional Development Award, Berkeley	2025
Data Science & AI Fellowship, Berkeley Social Science Data Laboratory, \$4,800	2024-25
Harold L. Wilensky Fellowship in Political Science	2023
China Hands “10 Under 25,” Yale University	2023
First Generation Scholars Grant, American Political Science Association	2023
Emerging Scholars Grant, International Studies Association	2022
Award for Methodology Training, Berkeley	2022
Dean’s Scholarship, Johns Hopkins University, \$7,500	2019-20
Runner-up Prize, Consulting Case Competition, Deloitte	2019
Best Academic Award, Hong Kong Baptist University (selection rate: 1/800)	2018
First Class Award, Hong Kong Baptist University	2016-18
National Grants, Chinese Ministry of Education	2017
National Scholarship, Chinese Ministry of Education (selection rate: 1/2,000)	2016
Fung Sun Kwan Scholarship, Fung Sun Kwan Foundation	2016
National Endeavor Scholarship, Chinese Ministry of Education	2015
